# Find out how easy professional services acquisition can be. Getting the right resources at the best rates with the most flexibility -

## That's the GRSi CIO-SP3 Advantage.

GRSi is an innovative and mature information technology (IT) professional services company, with multiple contracts in excess of \$225 million and a backlog of more than \$1 billion in contracts. Our core competencies for more than a decade are in IT, engineering, and professional services support for customers that include the National Institutes of Health (NIH), Federal Bureau of Investigation (FBI), Centers for Medicare & Medicaid Services (CMS), Johns Hopkins University Applied Physics Laboratory (JHU/APL), the U.S. Space and Naval Warfare Command (SPAWAR), U.S. Marine Corps, and the U.S. Army, among others.

GRSi's management approach offers a simple and straightforward management structure and effective contract management control. Our approach builds on four fundamental elements: an experienced PM; an agile and flexible organization; structured processes; and committed subcontractors. These integrated elements allow us to respond, implement, and manage task orders (TOs) to meet the critical performance requirements and expectations of our customers.

GRSi's lean management structure provides a one-step reachback to support our CIO-SP3 PM, Ms. Yarnell. With one discussion, the PM can access every resource area of GRSi, including recruiting, contracts, business and proposal development, and SMEs. By combining our formal governance structure with the day-to-day management of our empowered PM, we build a mechanism of assurance and rapid mitigation for service delivery to accomplish the mission.

“ ... quality practices were realized through subcontracting efforts as well, resulting in high quality teaming solutions to best fit government requirements. Minimal government technical direction is required ... [GRSi provided] proactive management and customer focused staff and excellent management of subcontractors.”— Contractor Performance Assessment Reporting System (CPARS), SPAWAR Contract

### WHY GRSi?

- ◆ In-place CIO-SP3 task order process that provides visibility on every task order released on the vehicle to all teammates.
- ◆ Dedicated CIO-SP3 SB Program Manager readily available to discuss opportunities with teammates and facilitate meetings with subcontractors, NITAAC Service Center personnel, and potential customers.
- ◆ Prime contractor on more than 10 contract vehicles with teams ranging from 3 to 25 companies.
- ◆ Commitment to subcontractor interaction on contract vehicles, providing as much as 39% subcontracted work across more than 40 task orders on one contract alone
- ◆ Highly selective teaming process—We team with subcontractors with like-minded approach that our employees are our greatest asset, ensuring we provide comparable benefits to reduce
- ◆ With more than 70% of all of our contracts being IDIQ, our unsurpassed success in managing IDIQ contracts and subcontractors
