

## IT ENTERPRISE SOLUTIONS - 3 SERVICES (ITES-3S)

**Overview:** The ITES-3S IDIQ contract vehicle provides the full range of IT services and solutions to the federal government. ITES-3S is managed by the Army Computer Hardware, Enterprise Software and Solutions (CHES) program, a part of Program Executive Officer Enterprise Information Systems (PEO EIS) at Ft. Belvoir, VA.

**Contract Types:** Performance Based Cost, T&M, FFP, and Cost Reimbursement Task Orders

**Period of Performance:** 25 September 2018 to 01 September 2023 with additional options

• **No contract usage fees • Decentralized Ordering • Open to Army, DOD and other Federal Agencies**

### GRSi's Capabilities Include:

#### IT MANAGEMENT

Complete IT Management for 10,000+ direct and 100,000+ indirect users globally — SysOps, DevOps, CI/CD, DR/COOP. From classified Defense intelligence grid systems to Civilian Health IT. Multi-tier IT Service Management (ServiceNow, Remedy, ITIL).

#### SOFTWARE DEVELOPMENT / INTEGRATION

Innovation with compliance and agility with control. CMMI/dev-M3 appraised processes coupled with Agile best practices, proven in organizations at the enterprise level. Flexible lifecycle management using Agile, Scrum, Kanban, Scrumban, XLC, EPLC, SDLC, and CMMI.

#### CLOUD SERVICES

Complete migration, hosting, storage, backup, assessments and DR/COOP services for AWS, Azure, and hybrid implementations.

#### LIFECYCLE LOGISTICS SUPPORT

Cradle to grave logistics support for defense intelligence systems worldwide, as well as scientific and Health IT systems and peripherals for Federal Intelligence, Healthcare, and commercial organizations.

#### CYBER SECURITY

Protect, Detect, Defend – Full spectrum cyber security support including hardening, resilience, ISSO support, DIACAP/RMF (support & transition, A&A, ATO), crypto, and vulnerability remediation.

#### SCIENTIFIC & HEALTH IT

Advanced Health IT, scientific, engineering, and research and development support for military, scientific, healthcare and aerospace missions. Full spectrum engineering and support, from analysis of alternatives to systems integration and deployment.
