GRSi
www.grsi.com

GRSi offers logical and practical security strategies and solutions to address complex cyber challenges. Our proven solutions, products, tool kits and services enable our customers to establish a cyber posture to Defend, Detect and Protect data and secure IT services.

GRSi brings a proven approach to cyber solutions across defense, intelligence, civilian and commercial markets. Our subject matter experts deliver breakthrough technology in areas such as:

- Information Management
- Information Assurance
- Cryptographic Services (Crypto & Encryption)
- Certification and Accreditation
- System Hardening - Tools & Services
- PKI / Common Access Card / PIV Integration
- COOP / Disaster Recovery
- Policy and Package Support (includes medical devices and specialized digital equipment)

By visualizing threats and helping ensure data integrity through advanced network security operations, GRSi provides customers with the needed expertise to effectively address operational needs, proactively balance risk management, and adhere to compliance requirements.

Look to GRSi to deliver realistic solutions that clearly demonstrate measurable results and aids its customers confidently in deploying secure platforms and technologies that can improve operations and reduce costs.

Top 5 Government Contractor, 2019, 2018
Top 5 Tech Company, 2017, 2016
Top 5 CEO, 2019, 2016

Fastest Growing Company, 2018
(4th time listed)

Best-Run Company, 2017
Contractor of the Year, 2016

Velocity Growth Winner, 2018
Baltimore & Washington, DC Regions

GRSi performs cyber security in the strictest of environments for risk and control; from health IT where life and privacy are at stake, to intelligence and defense systems where the criticality of operational risk management and data protection are nearly immeasurable.

Proven, Next Generation Tools and Technologies

Assured Compliance Assessment Solution (ACAS) | Automated and manual application security testing | Automated and manual compliance testing | Automated and manual vulnerability remediation, detection, prevention | Bash and Korn Shell Scripting | Carbon Black Cloud Services | Chef InSpec 3.0 | Cybersecurity policy development and implementation | Cylance Protect | DoD Information Assurance Certification and Accreditation Process (DIACAP) | DoD Information Assurance Risk Management Framework (DIARMF) | Enterprise Mission Assurance Support Service (eMASS) | ESET Security Management Center | FireEye Enterprise Security | Forescout 8.1 | FreeNAS storage operating system | Group Policy Objects (GPO) | IBM BigFix Endpoint Management and Security Platform | IBM Security AppScan | Image hardening | LanSweeper IT management software | Memorandum for Record (MFR) | Microsoft System Center Configuration Manager (SCCM) | Navy Qualified Validators (NQV) | Nessus SecurityCenter | NetSparker Web Application Security Solution | Nmap network mapper | Open Web Application Security Project (OWASP) | Penetration testing | Plan of Actions and Milestones (POA&M) tool | Qualys Cloud Security | Risk Evaluation Threat Assessment (RETA) | RMF Bridge Conversion (RBC) | Security Content Automation Protocol (SCAP) | Security Content Automation Protocol (SCAP) | Security Technical Implementation Guide (STIG) viewer | Splunk Enterprise Security | Tactical and Cyber Innovation Toolkit (TACIT) | Tenable SecurityCenter | Threat, fraud detection, prevention, remediation and monitoring | Vulnerability Remediation Asset Manager (VRAM) | Windows PowerShell | WireShark network protocol analyzer

GRSi brings hundreds of talented resources in systems engineering, development, management and security to bear on solutions for our clients. We provide solutions across a wide portfolio of clients including NIH, CMS, SPAWAR, DISA, the U.S. Marine Corps, Navy, Army, and more.

When your requirements are critical and the stakes are extreme, GRSi answers the call with the needed talent and experience to deliver cyber security excellence.
